

Native Arabic Language Support Now Available For Linux!

LangBox International is an eGulf Technologies subsidiary based in Nice, France, that specializes in the Localization and Internationalization of UNIX and Linux Operating Systems and Applications.

LangBox International has developed several Internationalization packages for the UNIX® Operating System. After more than ten years of research and development in the field of multilingual support, LangBox International now offers support for the Arabic language under the UNIX® and Linux Operating Systems and for applications including X Window and OSF/Motif interfaces.

LangBox International customers are well-known manufacturers of UNIX® servers and workstations such as Sun Microsystems Inc. and Silicon Graphics Inc., recognized market leaders in the UNIX® market. Several software houses are also using LangBox International products to provide turnkey solutions using an Arabic interface under DEC, Unix or Solaris.

The LangBox International product family includes:

LANGBOX-ARA: A bilingual supplement to the UNIX® TTY device driver for character based interfaces. It provides seamless integration with applications such as Oracle, Informix, Sybase, Uniplex or Curses applications running on dumb terminals.

XLANGBOX-ARA: A bilingual supplement to the X Window/OSF Motif libraries for the graphical based interfaces. When used with the dynamic link feature, it adds bilingual capabilities to the existing Motif based applications without modifications.

AXMEDIT: An Arabic graphical Motif based text editor; running on any X Window server display. For more information, visit:
<http://www.langbox.com/arabic/>

AraZilla: A Web Browser based on Mozilla that supports the Arabic Language. Support of the Arabic language has been optimized using the XLANGBOX-ARA capabilities. It features Arabic text selection, cut-and-paste operations and allows the user to select text from the Web or from an Intranet document. The following components are supported:

- Mail/News
- Composer
- ChatZilla (IRC)
- Arabic Virtual Keyboard

For a free download of AraZilla for the Linux Operating System, please visit:
<http://www.langbox.com/AraZilla/>

Bi-Di Mozilla: Members of the LangBox International technical team are participating in the Bi-Di Mozilla project with the Mozilla team. For more information, please visit:
<http://www.langbox.com/AraMosaic/mozilla/>

AraWebParse: A free service offered by LangBox International. It requires a Browser that supports Dynamic Fonts (such as Netscape 4.x or MS IE 4.x/5.x). AraWebParse allows the user to display an Arabic Web page dynamically on a Latin based Browser, using PFR Dynamic Fonts. For more information, please visit:
<http://www.langbox.com/arabic/arawebparse.html>
