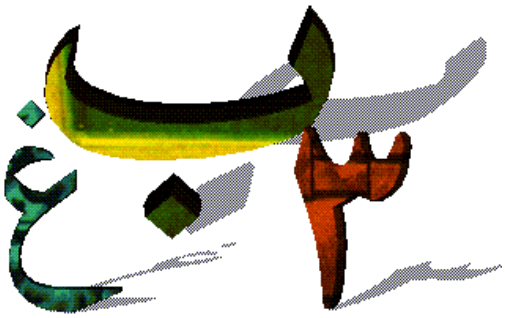
LangBox International

Native Arabic Language Available Under UNIX®



***LangBox International** is a company based in Nice, south of France, and specializes in Localization and Internationalization of UNIX® Operating Systems and Applications.*

LangBox International has developed several Internationalization packages for the UNIX® Operating System. After more than ten years of research and development in the field of multilingual support, LangBox International has introduced the support of the Arabic language for the UNIX® Operating System and applications including X Window and OSF/Motif interfaces.

LangBox International customers are well-known manufacturers of UNIX® servers and workstations such as Sun Microsystems Inc. and Silicon Graphics Inc., who are market leaders in the UNIX® market. Several software houses are also using LangBox International products to provide turnkey solutions using a full Arabic interface under Digital Unix (OSF1) or Sun Solaris.

The main product lines of LangBox International are:

LANGBOX-ARA: Bilingual supplement to the UNIX® TTY device driver for character based interfaces. It provides a full transparent use with applications such as Oracle, Informix, Sybase, Uniplex or Curses applications on dump terminals.

XLANGBOX-ARA: Bilingual supplement to the X Window/OSF Motif libraries for the graphical based interfaces. When used with the dynamic link feature, it adds bilingual capabilities to existing Motif based applications without modifications.

AXMEDIT: Arabic graphical Motif based text editor; runs on any X Window server display.

For more information see:
`http://www.langbox.com/arabic.html`

LangBox International is also involved in the products for the Internet:

AraMosaic: Arabic enhanced X Mosaic Web Browser: This browser dedicated for Arabic language has been optimized using the XLANGBOX-ARA capabilities and allows the user to browse Arabic text document from UNIX® workstations. Arabic text selection and cut and paste operations are possible and the user can pick text from the Web or an Intranet document. AraMosaic is available for free download from:
`http://www.langbox.com/AraMosaic/`

Bi-Di Mozilla: Members of the LangBox International technical team are leading the Bi-Di Mozilla Unix project with the Netscape team. For more info visit:
